

Krist Galstyan

Full Stack Developer

My name is Krist Galstyan, and I am a courteous and enthusiastic individual with a deep interest in the field of IT, particularly web programming. I find immense fascination in developing applications and building websites. I am always eager to expand my skill set and stay up-to-date with the latest developments in the industry.

Currently, I am actively seeking employment opportunities or an internship as a front-end developer.

Native

Skills

Front-end: HTML5, CSS(sass,scss), JavaScript, React, Redux(toolkit), TypeScript(basic)	Back-end: NodeJs, ExpressJS, MongoDB	Version Control (git, gitHub)
--	--------------------------------------	-------------------------------

Projects

In my recent project, I created banking website where I had the opportunity to work extensively with both the client-side and server-side components. As part of this project, I implemented the login logic, securely stored card data, and facilitated account transactions .

I've also created my own library from which I got the final result easily
